MOHD SHAMI

Data Analyst | ML Engineer | Data Science

Email: (codexshami@gmail.com) **|Moradabad, India | +918923591576**

LinkedIn: (linkedin.com/in/codexshami) **| GitHub:** (github.com/codexshami) **| Portfolio:** (codexshami.github.io)

PROFESSIONAL SUMMARY

Results-driven Data Analyst & ML Engineer skilled in Python, SQL, and data visualization, with expertise in EDA, predictive modelling, and dashboard development. Built end-to-end data solutions, improved model accuracy up to 85%, and delivered actionable insights for data-driven decision-making.

SKILLS

- **Languages:** Python (Pandas, Scikit-learn), R, SQL
- **Tools:** Jupyter, Docker, Power BI, Excel, Tableau, Git
- **Statistics:** Descriptive & Inferential Statistics, Hypothesis Testing, Probability
- **Data Analysis:** Data Cleaning, Data Wrangling, EDA, Data Transformation, Feature Engineering
- **Business Skills:** KPI Analysis, Dashboard Development, Reporting, Data-Driven Decision Making
- **Soft Skills:** Problem Solving, Analytical Thinking, Communication, Teamwork

WORK EXPERIENCE

Data Science Intern | Codec Technologies India **Aug 2025 - Oct 2025**

• Developed predictive models for medical diagnosis, achieving 85% accuracy and improving decision support.

• Conducted EDA and preprocessing on healthcare datasets to identify key patterns and trends.

Python Developer intern | CodTech IT Solutions PVT LTD **June 2025 - Aug 2025**

• Performed data analysis using Pandas and NumPy.

• Developed Python scripts for data cleaning and preprocessing.

PROJECTS

Revive – ML-Based Disease Prediction WebApp: codexshami/Revive **Jan 2026-Mar 2026**

- Improved diagnosis accuracy from 72% to 85% using XGBoost, reducing error by 18%
- Performed EDA and visualization to derive actionable insights
- Python, Flask, Bootstrap, Machine Learning, XGBoost, GitHub

HamOrSpam-Classifier: codexshami/HamOrSpam-Classifier **May 2025-Aug 2025**

- Email protection system that accurately classifies spam messages with 98%+ accuracy
- TF-IDF Vectorization, SMOTE Balancing, NLP, Logistic Regression

FarmAIQ – Smart Agriculture Recommendation System: codexshami/FarmAIQ **Nov 2025-Dec 2025**

- Developed ML-based crop recommendation & disease detection system with high prediction accuracy
- Performed EDA, feature engineering, and model optimization using Python, Random Forest, and CNN on Kaggle datasets, enhancing model performance and scalability

EDUCATION

Teerthanker Mahaveer University Moradabad

Bachelor of Technology- Data Science Uttar Pradesh, India

YGPA **- 8.5** 2023 - 2027

CERTIFICATES

- Data Analysis & Problem Solving, Getting Started with Data**:** **IBM (2026)**
- Scientific Observation from Space: **ISRO (2026)**
- Deep Learning, Machine Learning using Python: **Simplilearn (2025)**
- Python, SQL, Problem Solving: **HackerRank (2025)**
- Advanced Data Analysis (Excel & Power BI): **ITM EdTech (2025)**

KEY ACHIEVEMENTS & ADDITIONAL HIGHLIGHTS

- **Selected in college-level round of Smart India Hackathon (SIH)** and advanced to the next stage
- **3× participant in Brain Manthan**, showcasing strong critical thinking and aptitude skills
- **Achieved 1st rank in Academics** among peers for outstanding performance
- **Exhibitor – India AI Impact Summit**: Presented PSIT Virtual Lab Platform and its real-world impact
- **Solved Data Structures & Algorithms problems** daily on LeetCode, strengthening problem-solving and coding efficiency.
